

EMBASSY OF LEBANON
TO THE HELLENIC REPUBLIC

No. 32/2020

The Embassy of Lebanon to the Hellenic Republic presents its compliments to the Ministry of Foreign Affairs of the Hellenic Republic – Protocol Department – and regret to inform the esteemed Ministry that following the unprecedented and deadly blast that rocked the Port of Beirut on the 4th of August, 2020, and its devastating consequences on lives, properties, food supplies and on the environment - a disaster of a scale and magnitude that Lebanon cannot deal with on its own, Beirut was declared a disaster-stricken city. The entire international community, including the Hellenic Republic, has expressed its solidarity towards and willingness to assist the Lebanese Government and people during this tragedy.

Therefore, in light of the traditionally friendly relations that unite the Republic of Lebanon and the Hellenic Republic, and in order to alleviate the impact of this disaster on all levels, a wide range of humanitarian and infrastructure assistance, listed below, is needed:

- First, medical assistance and material for the treatment of the wounded and injured and those with bone fractures, bruises and burns, and all the supplies for surgical and medical operations, whether needed for the existing medical centers which are already overwhelmed by the COVID-19 epidemic or through the establishment of field hospitals...
- Second, food assistance, and supply of basic products such as wheat and flour and cereals and canned foods in order to help the affected populations get over the expected period of shortage as a result of the burning of the stock that was stored in the silos in Beirut port, rendered completely un-operational.
- Third, building material, given the scale of the damage to the infrastructure and to the public and private properties, such as building material, glass, aluminum and electrical equipment among others, in order to shelter those who lost their homes.
- Fourth, necessary supplies and logistics to reconstruct and re-equip the vital port of Beirut, enabling it to become fully operational again as soon as possible, given its importance in supplying the basic needs to the exhausted Lebanese economy.

The Embassy of Lebanon to the Hellenic Republic would be grateful for relaying the present note to the Greek competent authority for their kind consideration and avails itself of this opportunity to renew to the Ministry of Foreign Affairs of the Hellenic Republic -Protocol Department- the assurances of its highest consideration.

Athens, August 6, 2020
